

DAWSON

SWING SPEED

Adjust the speed at which the door closes from the open position (90°) to 20° from closed.

Adjustment

To adjust the swing speed of the door, insert a 3/32" Allen wrench into the adjustment hole labeled "SS".

To **decrease** the swing speed – turn wrench **clockwise**.

To **increase** the swing speed – turn wrench **counter-clockwise**.

Note: Completely closing the swing speed valve will prevent the door from closing.
